

EXPLORER® BLUETOOTH HANDSET

Bluetooth handset for cordless satellite voice communications

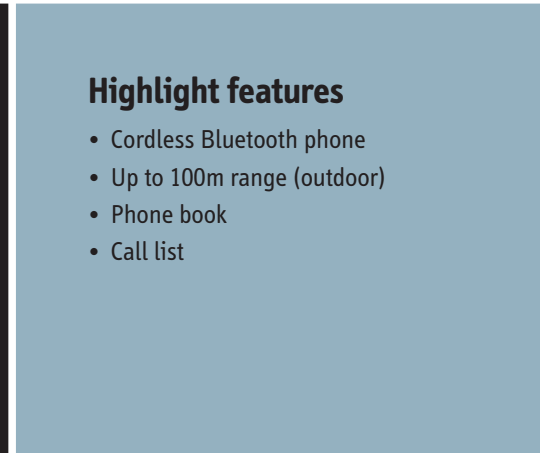

EXPLORER Bluetooth handset is a cordless handset optimised for users of satellite communications devices. It enables worldwide communication when used with any portable EXPLORER terminal.

Wireless handset with long range

When working in the field it can be a real advantage to work with wireless devices. The EXPLORER Bluetooth handset adds great value to your EXPLORER satellite terminal, enabling global wireless voice communication from anywhere in the world.

The EXPLORER Bluetooth handset gives you all basic telephone features, such as call back, phone book and call lists.

It is possible to make a telephone call outdoors at up to 100 metres from the EXPLORER terminal. Inside a building, it is possible to make a telephone call from the adjoining two or three rooms, depending on the layout of the building.

Highlight features

- Cordless Bluetooth phone
- Up to 100m range (outdoor)
- Phone book
- Call list
